

# SAFE MONEY TRANSFER SUITCASE

USING **SMOKE** AND **INK**

**PREVENT THEFT**  
FROM

- MONEY
- DOCUMENTS
- PRECIOUS OBJECTS

The transportation of the bag can be done by two ways

1. By holding it

- a. this requires the holder to keep the grip pressed
- b. The button can be left and be pressed again in 1 sec without problem. That makes the suitcase's transportation easier

2. By car

- a. the special cable located in a fixed point of the car for example the door handle
- b. any attempt of cutting the wire, removing the suitcase or shorting the cable enables the protection actions which are described before

SECURITY SYSTEMS

When someone tries to steal the suitcase,  
the safety mechanism gets activated:

1. Blasting off colored smoke on the thief who gets painted.
2. Blasting off colored smoke inside the suitcase painting everything that is inside it.
3. Blasting off ink painting everything that is inside the suitcase making it useless for the thief.  
However the suitcase holder can exchange the money in the bank.
4. The alarm is activated by means of a very loud siren (80db).

## THE SUITCASE CONTAINS:

### INTERNAL

1. Red coloured smoke which is ejected for 50sec.
2. Injection system which sprays 1kg ink.

### EXTERNAL

1. Red coloured smoke which is ejected for 50 sec.
2. The cable which is connected at a fixed point of the car.

## TRACKING SYSTEM WITH GPS

THE SUITCASE CONTAINS TRACKING SYSTEM WHICH  
KEEPS TRACK OF THE STOLEN ONE.
